

Aashutosh Dahal

Lalitpur, Nepal • +977 9706770437 • aashutoshdahal444@gmail.com • github.com/AashutoshDahal22 • [LinkedIn](#)

Full-Stack Developer with experience building backend systems using Java, Python and JavaScript based frameworks, and REST APIs alongside React/Next.js applications and interactive 3D/WebAR experiences. Experienced in delivering production projects, leading small development teams, and translating technical concepts into practical learning experiences.

Education

University of Wolverhampton (Herald College Kathmandu)

BSc (Hons) Computer Science, Software, 73%

Relevant Coursework: Full Stack Final year project(FYP), Research Paper on Anomaly Transformers

WLV , UK
July 25 ,2025

Uniglobe SS/College

Science & Computer Major — GPA: 3.57/4.0

Kamaladi, Kathmandu
2022

Technical Skills & Projects

Programming: Java, Typescript, Python, SQL

Frontend: HTML, CSS, Next Js, Three Js, Tailwind CSS

Backend: Spring & JEE, ExpressJs, DjangoRest

Tools: Git, GitHub, Docker, AWS, Postman, Jira

Design: Figma, Canva

CLINIC MANAGEMENT SYSTEM: Final Year Project

Dec 2024 - May 2025

Engineered a full-stack clinic management system using the MERN stack to manage patient records, appointment scheduling, and medical histories.

Designed role-oriented workflows to streamline clinical operations and improve access to patient and appointment information.

Developed RESTful backend services with Node.js and Express.js, integrating MongoDB for persistent application data.

Fraud Detection using Anomaly Transformer

April 2025 - May 2025

Implemented a Transformer-based time-series anomaly detection model in PyTorch using **association discrepancy** to identify anomalous financial transaction patterns.

Configured reproducible model training and dataset pipelines using Hydra, supporting experimentation with custom datasets.

Evaluated the approach on the **BankSim** synthetic financial transaction dataset for fraud/anomaly detection

Relevant Experience

Skill Spark

Sankhamul, Kathmandu

Instructor/Mentor

June 2026 – Current

- **Designed** Python and DjangoRestFramework curriculum covering programming fundamentals, data structures, debugging, and practical software development.
- **Delivered** hands-on instruction through project-based exercises, helping students progress from programming fundamentals to independent projects.
- **Developed** coding exercises, assignments, and structured learning materials aligned with beginner and intermediate programming levels.

- **Mentored** students through debugging, problem-solving, and project implementation to build independent development skills.

Aricalot Technologies

Baluwatar, Kathmandu

Backend Development Trainee

Jan 2026 – Apr 2026

- **Developed** 4 core backend modules for **LegalCadence**, a legal workflow SaaS platform, using JavaEE, Spring Boot, and JPA/Hibernate.
- **Implemented** role-based access control with Spring Security across admin, lawyer, and client workflows.
- **Built** REST APIs for case-management functionality and documented endpoints using Postman documentation for frontend integration.
- **Collaborated** within an Agile/Scrum development workflow, managing implementation tasks and sprint deliverables through Jira.

ING Skill Academy

Bijulibazar, Kathmandu

Frontend & Spatial Development Intern

May 2024 – Dec 2025

- **Engineered** 5+ interactive AR/3D web applications using React, Three.js, React Three Fiber, A-Frame, Google Model Viewer, and MindAR.
- **Developed** the SMaRC 3D website from concept through deployment, creating an interactive platform for students and researchers.
- **Built** an interactive 3D/AR digital brochure for Islington College Kathmandu, showcased at **Futurama and BIC Experience** academic events.
- **Developed** WebAR experiences optimized for mobile and desktop environments, addressing cross-device rendering and performance issues.
- **Created** an interactive riddle-based educational game for Kavya College, combining web development with gamified learning.
- **Produced** educational robotics content covering grades 4–9, contributing technical material to the academy's curriculum.
- **Applied** React-based frontend development and 3D web technologies to deliver interactive educational and promotional experiences.

Leadership & Activities

ING Skill Academy

Bijulibazar, Kathmandu

3D Game Development Team Lead

May 2024 – Dec 2025

- **Led** a 2–3 person development team in building a gamified cybersecurity learning platform using React Three Fiber.
- **Coordinated** development milestones across different **time constraints**, translating gameplay and learning requirements into technical deliverables.
- **Directed** 3D game-development architecture, implementation, debugging, and integration across team members.
- **Managed** technical priorities and development blockers while contributing directly to core implementation.

ING Skill Academy

Bijulibazar, Kathmandu

Game Development Instructor

May 2024 – Dec 2025

- **Trained** 50+ Grade 10 and Grade 12 graduates through hands-on workshops in web and game development using **Scratch** and **HTML/CSS** under the **SEP and GPPC programs**.
- **Showcased** AR/3D applications at **Futurama and BIC Experience**, demonstrating interactive digital

experiences to students and academic audiences.

- **Contributed** robotics and technology-learning content to the academy's educational programs, supporting curriculum development for students in Grades 4–9.
